Rickrack

In the age of digital creativity, the color palette has become an indispensable tool for designers. A good color palette can make a design more attractive and coordinated. Rickrack is designed for you if you are looking for an excellent color palette software! Rickrack has various color mixing functions and is suitable for various scenes. Rickrack is easy to use, and more importantly, it's completely free without networking or registration required.

Rickrack (**R**eal-t**i**me **C**olor **K**it) is a free and user-friendly color editor. It is designed to generate a set of harmonious colors from the color wheel or other places. You can share these colors with your friends, or apply them into your creative works. What's more, you can export them into individual files and import them into other softwares such as Adobe Photoshop, GIMP, Krita, Pencil 2D and Clip Studio Paint. Rickrack can run normally on operating systems such as Windows, Linux, and macOS.
